Global Cosmetics Company

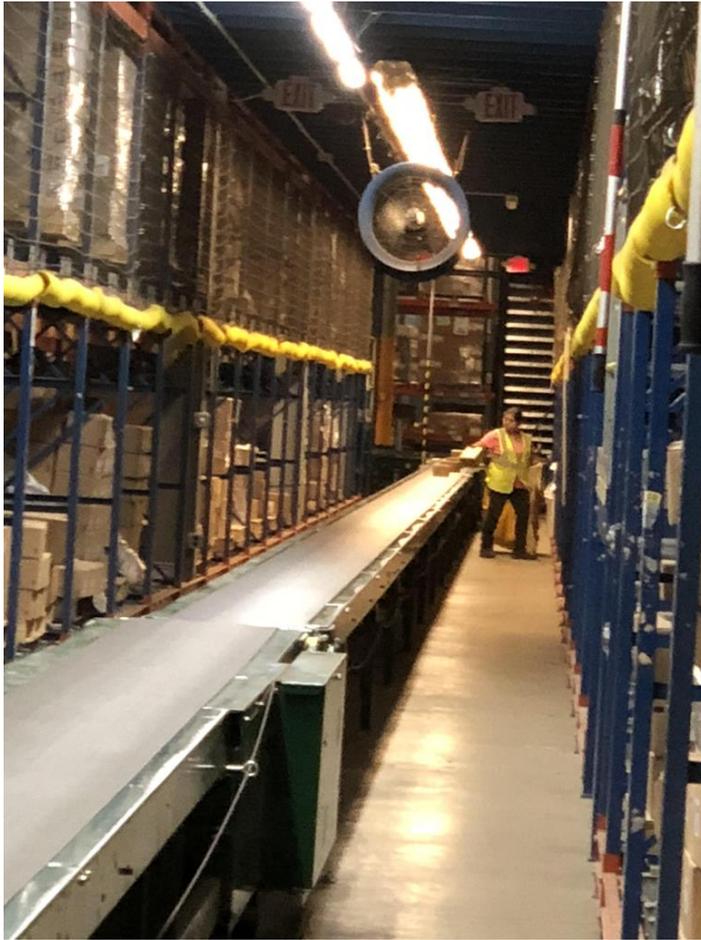

Two years ago, this global cosmetics company reached out to Vested Energy to find a better way to support its energy conservation initiative.

As a manufacturer partner, we delivered better results with wholesale pricing and handled all the details of the lighting logistics. In addition, we took the rebate off the LED lighting purchase upfront to help produce a positive ROI in less than two years.

Now in several states and locations with this global cosmetics company, Vested Energy has helped them achieve international recognition and a reduction of their carbon footprint in the millions.

Projects	2 locations in NJ, and other locations in AR, KY, TX
Square Footage Addressed	2.74 million sq ft
Fixture Types Used	225W high bays, 40W low bays, 50W 2x4 center basket troffers
Annual kWh Savings	3.5 million
Annual Energy Cost Savings	\$322,380
10 Year Energy Cost Savings	\$3.22 million
Average Energy Savings %	56%
Average ROI	1.62 years
Total Rebate Subsidies	\$267,523
IRR	37%
CO2 Reduction	4.2 million lbs.

Headquarters
Wayne, PA

As a manufacturer-direct representative, we pass on the savings on to you.

Our LED lighting technologies deliver exceptional lighting with a 10-year manufacturer's warranty. LED lights can last 5x longer than conventional conventional fluorescent fixtures with up to a 75% reduction in energy costs. In addition, the light output is more effective for worker productivity and safety.

Located just outside of Philadelphia, we are easily able to handle multi-location properties... with easy access to airports, an installation team with 22 locations throughout the United States, and International manufacturers possessing many domestic and global distribution centers.

We work with utility companies throughout the US and help calculate your savings, rebates and ROI, as a complimentary service. Again, making your operating overhead a lot lighter and much brighter!
